

Introduction

The material is a polyamide 12 with high-temperature resistance, good toughness, and high strength, which suitable for functional verification of product prototypes.

Advantages

The perfect combination of exquisite details and ultra-high dimensional accuracy can produce extremely fine small holes, thin walls, shanks, solid structural parts, complex parts, and lattice structural parts, thus producing high-quality parts.

Disadvantage

Grainy surface, more expensive.

Tolerance

200µm or 0.2%

Recommendation

High heat distortion temperature and high strength, can be used as functional parts.

Attention >

Grainy surface please notice that in advance. If you have higher requirements on strength and temperature resistance, please choose Fiberglass for verification.

Attributes

Heat deformation: (0.45 MPa) (GB/T 1040.2-2006): 145 °C

Heat deflection temperature (1.8 MPa) (GB/T 1040.2-2006) : 82 °C

Melting point: 183 °C

Tensile strength (GB/T 1040.2) : 46 MPa

Tensile modulus (GB/T 1040.2): 1600 MPa

Breaking elongation rate (GB/T 1040.2): 36%

Bending strength (GB/T 1040.2): 46.3 MPa

Flexural modulus (GB/T 1040.2): 1300 MPa

Notch impact strength (GB/T 1843) : 4.9 KJ/m²

Unnotched impact strength (GB/T 1843): 13.2 KJ/m²

Dielectric constant 60 Hz: 3.5

Applications

> Structural verification of auto parts and their supplies

Car bezels, rearview mirrors, dashboards, steering wheels, lights, seats, handles, etc.

> Structural and functional verification of household appliances

Air conditioner, air purifier, vacuum cleaner, electric fan, ironing machine, water dispenser, juicer, hair tdryer, etc.

> Structural and functional verification of digital electronic products

Laptops, tablets, mobile phones, digital cameras, game consoles, audio, MP3, mobile power, etc.

> Structural and functional verification of electro mechanical equipments

Industrial display panels, cameras, switches, sockets, power tools, electrical instruments, experimental instruments, measuring tools, etc.
